

EU Student Mobility

Which countries are benefiting from Erasmus?

▶ This plot shows the top ten countries that sent the most number of exchange students through EU's Erasmus programmes during 2014 and 2020.

The exchange period varies from one day to over one year.

This is an overview of the number of students sending and receiving by each country under Erasmus programme during 2014 and 2016. The size of point is proportional to the population of the country in year 2015.

Countries that sent more student tended to receive more students, indicating higher engagement in the program.
